## **PERMISSION TO USE**

In presenting this thesis in partial fulfilment of the requirements for a post graduate degree from Universiti Utara Malaysia, I agree that the universiti library may make it freely available for inspection. I further agree that permission for copying of this thesis in any manner, in whole or in part, for scholarly purposes may be granted by my supervisor(s) or, in their absence, by the Dean of the Graduate School. It is understood that any copying or publication or use of this thesis or parts thereof for financial gain shall not be allowed without my written permission. It is also understood that due recognition shall be given to me and to Universiti Utara Malaysia for any scholarly use which may be made of any material from my thesis.

Request for permission to copy or to make other use of materials in this thesis, in whole or in part, should be addressed to:

**Dean of Graduate School**

**Universiti Utara Malaysia**

**06010 UUM Sintok**

**Kedah Darul Aman**

## **ACKNOWLEDGEMENTS**

In the name of Allah, the Most Gracious and the Most Merciful.

It is with pleasure that I take this opportunity to express my gratitude to those of you who have provided the support and encouragement, which have meant so much to me in this dissertation.

I wish to express my thanks and my appreciation to my supervisor, Assoc. Prof. Dr. Ang Chooi Leng. Her guidance was invaluable and her enthusiasm was an inspiration. My thanks also to Dr. Engku Muhammad Nazri bin Engku Abu Bakar as the co-supervisor, for his assistance and ideas towards this dissertation.

I would also like to thank the Dissertation Committee, Assoc. Prof. Dr. Razman Mat Tahar and Assoc. Prof. Dr. Nurahimah Mohd Yusoff for their comments and ideas to improve this dissertation.

I am grateful too, to the individuals who participated in my study. These people not only gave me data, they provided insights into the world of work, which will serve me for years to come. These are the people whose efforts literally made this dissertation possible.

I also owe a great deal of thanks to my family. To my parents, Ayah and Mak, for encouraging me all the years and having confidence that I could succeed. To my brothers and sisters, Along, Akak, Kak Long and Abang Ngah for listening to all my complaints and always encourage me to persevere.

Finally, there are a host of colleagues in Master of Decision Science programme who are also contributed to make my experience at Universiti Utara Malaysia memorable and my dissertation done. My thanks to Coknin, Kak Ita, Ros, Aida, Deqta, Kak Shibah, Kak Kiah, Kak Aza, Kak Sham, Kak Zu, Hisham, Ruzelan and all the others with whom I have shared this road.

Thank you all.

## ABSTRAK

Kajian ini adalah suatu kajian kualitatif menggunakan kajian kes. Kajian dijalankan menerusi penelitian terhadap pengalaman para pengurus sebuah syarikat pengeluaran dalam proses pembuatan keputusan. Kajian ini turut cuba memahami proses pembuatan keputusan sebenar di dalam persekitaran perniagaan dan menentukan bagaimana proses tersebut berbeza daripada proses secara teori seperti yang terdapat dalam buku-buku rujukan. Ia juga cuba mengenal pasti faktor-faktor berkaitan yang menyumbang kepada proses pembuatan keputusan efektif dengan fokus kepada faktor manusia seperti ciri psikologi, gelagat dan sikap. Responden kajian terdiri daripada empat pengurus, tiga lelaki dan seorang wanita daripada jabatan yang berlainan. Pengumpulan data adalah menerusi temubual separa-struktur yang dirakamkan dengan keizinan pengurus. Selain temubual, beberapa ujian penilaian telah diberikan kepada para pengurus bagi membantu memahami karektor dan sikap mereka dalam membuat keputusan. Penilaian tersebut terdiri daripada Topologi Personaliti Jung (seperti yang digunakan dalam *Myers-Briggs Type Indicator*), penilaian kreatif dan penilaian corak pengurusan konflik. Hasil kajian mendapati bahawa selain daripada kemudahan teknologi informasi komunikasi (ICT) yang digunakan, faktor manusia seperti ciri personaliti dan jenis psikologi turut mempengaruhi pembuatan keputusan. Hasil kajian turut menunjukkan bahawa para pengurus mempamerkan beberapa ciri yang serupa dalam membuat keputusan seperti pintar, tajam pemerhatian, penuh minat, berfikiran terbuka dan inovatif.

Katakunci: Proses pembuatan keputusan, pembuat keputusan, faktor manusia.

## ABSTRACT

This study is a qualitative research approach involving case study. The study is conducted through an in-depth investigation on the experience of managers in decision making process in a manufacturing company. The study attempts to understand the actual decision making process in business environment and determine how the process differs from the theoretical process laid out in textbooks. The study also tries to identify the pertinent factors contributing to an effective decision-making process focusing on human factors, such as psychological traits, behaviour and attitudes. The respondents of the study comprised of four managers, three male and one female managers from four different departments. Data were collected using semi-structured interviews, which were tape-recorded with permission. Besides interviews, a few assessments were also given to managers to help understand their characteristics and attitudes in making decision. The assessments comprised of Jung's Personality Typology (as operationalized in the *Myers-Briggs Type Indicator*), creative assessment and conflict management style assessment. Findings showed that apart from Information Communication Technology (ICT) facilities, human factors such as personality traits and psychological types also influence decision making. Findings also indicate that managers exhibit a few similar traits in making decision, such as resourceful, observant, enthusiastic, open-minded and innovative.

Keywords: Decision making process, decision makers, human factors.

# **CHAPTER 1**

## **INTRODUCTION**

### **1.1 Decision Making**

Decision making is a process of choosing among alternative courses of action for the purpose of attaining a goal or goals (Turban & Aronson, 2001). The alternatives are the possible decision we can make. However, before evaluating the alternatives, there are a few common steps applicable to all decision-making circumstances. Numerous authors (e.g. Schoderbek, Cosier & Aplin, 1991; Stevenson, 1999; Moody, 1983) share the common notion and have listed the following steps:

- 1) Identify the problem.
- 2) Generate alternatives.
- 3) Evaluate alternatives.
- 4) Select the best alternative.
- 5) Implement the chosen alternative.
- 6) Monitor the results to ensure that desired result is achieved.

The steps above are also known as rational decision-making process. However, in business environment, not every problem could be solved following rational models.
